Shrew Soft Inc Secure your remote access communication with the Shrew Soft VPN Client!.. Nov 09, 2015 For me and my work the shrew-soft is an essential and basic tool for me because my work, data exchange between win and mac for the vpn-files (I have over 200 access-files for shrew to work remotely with my customers and I won't definitively use alternative clients) has high priority.. Xauth is an issue to Juniper devices, for some reason IPsecuritas seems to be unable to see the peer as xauth compatible.

With a free VPN client I assume its more complicated than just specifying the IP, username and password.. Is there an equivalent client for Mac OS X that will allow me to take this vpn file and import it and connect to the VPN.. To be honest, I find it to troublesome (not to mention alot of hoops to go through to get the taps running) and prefer IPsecuritas.. If there is a VPN client that will allow me to manually enter this information then great, but I havent found one as yet.. What type of VPN appliance are you using The OS (at least modern versions) has a built-in VPN client for IPsec (including Ciscos version) and PPTP..
